Racing Post Smart View is the new unbiased, comprehensive and intuitive tool for all racing fans. Using our unrivalled racing database, our team of data scientists has applied mathematical modelling and machine learning techniques to generate an objective assessment across six key attributes for horses in all British and Irish races.

These are presented in a format that allows you to either home in on individual attributes or be guided by the overall Smart View score, which is a weighted average of the six attributes and, like them, is scored out of 100. Whether you're a seasoned form student or a casual punter, Racing Post Smart View can help you to make more informed choices and more successful bets.

Racing Post Smart View is now available for every race on the Racing Post mobile app.
