Racing Post Smart View is the unbiased, comprehensive and intuitive tool for all racing fans. Using our unrivalled database, our data scientists apply mathematical modelling and machine learning techniques to generate an objective assessment across six key attributes for horses in all British and Irish races.

The format allows you to home in on individual attributes or be guided by the overall score, which is a weighted average of the six attributes and, like them, is scored out of 100. Whether you're a seasoned form student or casual punter, Smart View can help you to make more informed choices and successful bets.

Racing Post Smart View is available for every race on the Racing Post mobile app
